Notes regarding the operating manual

Symbols

Hazardous electric current!

Warns about hazards from electric current which can lead to injuries or even death.

Danger!

Warns of a hazard which can lead to personal injury.

Caution!

Warns of a hazard which can lead to damage to property.

Wear hearing protection!

Indicates the activities during which hearing protection is to be worn.

The current version of the operating manual can be found at:

TTV 4500 S

Legal notice

This release replaces all previous versions. No part of this publication may be reproduced without written permission from Trotec. The same applies for electronically processing, duplicating or spreading the publication. Subject to technical changes. All rights reserved. Trademarks are used without guarantee that they may be used freely and primarily following the spelling of the manufacturer. Product names are registered. Changes to construction in the interests of constant improvements to the product, as well as changes to the shape and colour are reserved. The scope of delivery may vary from product images. This document was created with all due care. Trotec accepts no liability whatsoever for possible mistakes or omissions. © Trotec

Warranty and liability

Damages caused by incorrect use by untrained people or start-up by unauthorised people are excluded from the warranty. The device complies with the fundamental health and safety requirements of the applicable EU regulations and was tested at the factory for perfect functionality multiple times. However, if faults in the functionality occur and cannot be remedied with the measures in the chapter Errors and faults, please get in touch with your dealer or distributor. Subject to changes to technical design and model changes as part of constant development and product improvement without prior notice. No liability is accepted for damages resulting from improper use. In such cases, entitlements to a warranty are then also forfeited.

Safety

Carefully read the operating manual before using the device and keep it within reach!

Danger!

Improper handling can lead to injuries due to parts being whirled up.

- Do not use the device in potentially explosive rooms and do not install it there.
- Do not use the device in aggressive atmosphere.
- Set the device in an upright and stable position.
- During normal operation an air transport hose or dust bag can be connected to the air outlet opening.
- For an increased performance up to 3 devices may be operated in batch mode, i.e. stacked on top of one another during operation. If so, no further accessories such as air transport hose or dust bag must be used.
- Up to 4 fans can be connected in series by means of the connection pieces.
- Ensure that the air inlet and outlet are not obstructed.
- Ensure that the side of the device where the air inlet is found is kept free of dirt and loose objects.
- Never reach or put objects into the device.
- Do not transport the device during operation.
- Ensure that all electric cables outside of the device are protected from damage (e.g. from animals). Never use the device if the cable or power connection is damaged!
- Only use extensions to the connecting cable which are appropriate to the device power consumption, the length of its cable and its use. Completely unroll extension cables. Avoid electrical overload.
- Never point the switched-on device at people or animals.
- Protect yourself and your environment from whirled up parts.
- Unplug the device from the mains before starting with maintenance, service or repair work.

Intended use

The axial fan TTV 4500 S may be used for aeration, deaeration, air circulation, dust collection or air transport whilst adhering to the technical data and the safety instructions.

The device was designed for the generation of a powerful, large-volume air circulation, e.g. for the accelerated drying of buildings and rooms.

Improper use

The axial fan TTV 4500 S is not suited for installation in fluids or on flooded or boggy grounds.

Any unauthorised changes, modifications or alterations to the device are forbidden.

Personnel qualifications

People who use this device must:

- be aware of the dangers that occur when using axial fans.
- have read and understood the operating manual, especially the Safety chapter.

Personal protective equipment

Wear hearing protection!

Wear hearing protection when spending a longer period of time in the vicinity of the device.

Residual risks

Hazardous electric voltage!

Work on the electrical components must only be carried out by an authorised specialist company!

Hazardous electric voltage!

Before any work on the device, remove the mains plug from the mains socket!

Danger due to strong air current!

Risk of injury from parts being whirled up. Before switching the device on, make sure that there are no loose parts located near air inlet or outlet!

Draw-in and entanglement hazard of loose parts!

Keep a minimum distance of 3 m to the suction side of the device!

Danger!

Do not leave the packaging lying around. Children may use it as a dangerous toy.

Behaviour in the event of an emergency

1. Immediately switch the device off via the emergency stop switch at the upstream distributor or the main switch at the device.
2. Remove persons from the danger area.
3. Disconnect the device from the electric circuit.
4. Do not reconnect a defective device to the mains power.

Information about the device

Description of the device

The axial fan TTV 4500 S was designed for a very high air flow. The high air volume flow and a variety of configuration options enable its flexible application ranging from construction drying, e.g. in combination with a condenser dryer, to the large-volume air transport even in dusty surroundings.

The cable of this device can be wound around the hose connection. The TTV 4500 S is further equipped with a service socket, which means that you can operate another device, e.g. another TTV 4500 S, in cascaded operation via the same socket. This socket is ready for operation for as long as the first device is connected to the mains – it does not need to be switched on.

The integrated operating hours counter can be used for the settlement with an insurance company or for construction site calculations.

Device depiction

No.	Designation
1	air outlet
2	air hose (optional)
3	mains power cable with Schuko plug
4	connection pieces
5	control panel

Storage

Storage

When the device is not being used, observe the following storage conditions:

- in dry surroundings,
- protected from dust and direct sunlight,
- with a plastic cover to protect it from invasive dust, if necessary.

Start-up

1. Take the device out of the cardboard box and remove the plastic packaging.
2. Assemble the device according to the desired area of application along with other devices or accessories.
 - Always use a tension belt to connect hoses or dust bags.
3. Set the device in an upright and stable position. Individually the axial fan can be installed at an inclination angle of up to 15 °.
4. Unwind the electric cable and connect the plug to a properly fused socket.
 - The fan is now ready for operation.

Operation

Control panel

No.	Designation
3	mains power cable
6	on/off step switch I - 0 - II
7	operating hours counter

Switching the device on

- Actuate the on/off switch (6) to switch the device on, thus choosing the desired air volume flow level:
 - stage I : approx. 4,350 m³/h
 - stage II : approx. 5,000 m³/h

Shutdown

- Switch off the device.
- Pull the plug from the mains socket.
- Clean the device according to chapter Maintenance.
- Store the device according to chapter Storage.

Errors and faults

The accurate functionality of the device was tested during production a number of times. However, if functionality faults do occur, then check the device according to the following list.

The device is not running:

- Check whether the device is switched on.
- Check the power supply.
- Check cable and power plug for defects.

The fan operates only for a brief period, then switches off automatically:

- Check whether the protective grid is blocked and clean it if required.
- The motor bearing or cable connections are defective. If so, contact your dealer.

Your device still does not operate correctly after these checks?

Bring the device to a specialist company for cooling and air-conditioning or to Trotec for repair.

Maintenance

Activities required before starting maintenance

- Before any work, detach the mains plug!

Maintenance tasks, which require the housing to be opened, must only be carried out by specialist companies for cooling and air-conditioning or by Trotec.

- Always pull the plug before starting any care or maintenance work.
- Regularly check the housing for its perfect condition or for defects.
- Always be mindful of atypical sounds and consult a specialist dealer if in doubt.
- Keep the fan clean.
- You can use a compressor to remove particles, lint, dust and dirt from motor, fan wheel and protective grid. Do not in any event use a high-pressure cleaner to clean the fan.
- Maintenance and repair work may only be carried out by Trotec.

Technical annex

Technical data

Parameter	Value
Model	TTV 4500 S
Air volume stage I	approx. 4,350 m ³ /h
Air volume stage II	approx. 5,000 m ³ /h
Noise level	74 dB(A)
Mains connection	1/N/PE~ 230 V / 50 Hz
Current consumption	1.7 A
Nominal capacity	325 W
Housing	plastic
Mobility	portable
Weight	14.8 kg
Dimensions (width x height x depth)	530 x 560 x 330 (mm)

Disposal

In the European Union, electronic equipment must not be treated as domestic waste, but must be disposed of professionally in accordance with Directive 2002/96/EC of the European Parliament and Council of 27th January 2003 concerning old electrical and electronic equipment. At the end of its life, please dispose of this device according to the valid legal requirements.

Declaration of conformity (translation of the original)

EC Declaration of Conformity in accordance with EC Machinery Directive 2006/42/EC

TROTEC® GmbH & Co. KG

Grebbener Straße 7
D-52525 Heinsberg

herewith declares that due to their design and construction, and in the version introduced by us, the following machines conform with the relevant fundamental requirements of the listed EC directives.

Important note:

In case of improper use, installation, maintenance etc. or unauthorized changes of the factory-supplied device version, this declaration loses its legal validity.
